Vishnu Vardhan

9182177915 repanavishnuvardhan67664@gmail.com linkedin.com/in/vishnuvardhan github.com/vishnu915
Bengaluru, Karnataka, India

Professional Summary

Business Systems Engineer with strong expertise in building internal tools and systems that help teams work better across Sales, Marketing, RevOps, Customer Success, and Finance. Proficient in **Python**, **JavaScript/TypeScript**, **SQL**, and databases. Skilled in **AI-native development** using coding agents including **Claude Code** and **Codex** to build significantly faster. Experienced in **LLM APIs**, **agent frameworks**, **Git**, and standard development workflows. Strong problem-solving ability with good business context, ownership from problem definition through rollout and maintenance, and ability to turn loosely defined problems into working solutions.

Technical Skills

AI-Native Development:	**Claude Code**, **Codex**, Coding Agents, AI-Assisted Development, Prompt Engineering
Languages:	**Python**, **JavaScript**, **TypeScript**, SQL
AI/LLM:	**LLM APIs**, **Agent Frameworks**, RAG, LangChain, AI-Powered Tools
Backend:	FastAPI, Flask, Node.js, REST APIs, Integrations, Automations, Workflows
Database:	**SQL**, PostgreSQL, MySQL, MongoDB
DevOps:	**Git**, GitHub, Standard Development Workflows, CI/CD
Other:	Custom Software, Internal Tools, Data Workflows, Problem Solving, Business Context, Ownership, Rollout, Maintenance

Relevant Experience

Intern Hyderabad, India
The Developers Arena *Nov 2025 – May 2026*

- Built and maintained internal applications, integrations, automations, and workflows using **Python** and **JavaScript**, improving team productivity by [40%] across [5+] business functions.
- Worked with business teams to understand problems and identify opportunities for automation or better tooling, delivering [10+] solutions with [95%] adoption.
- Used coding agents including **Claude Code** and **Codex** to build significantly faster, reducing development time by [50%] while maintaining reliable software.
- Built **AI-powered tools** using **LLM APIs** and **agent frameworks**, achieving [92%] accuracy and [35%] time savings for business users.
- Decided when to build custom software and when to use existing tools, optimizing for speed and reliability.
- Owned solutions from problem definition through rollout and maintenance, ensuring [90%] user adoption.
- Used **SQL** and databases for data workflows and integration, achieving [99%] data accuracy.

SDE Intern (AI/ML Developer) Bengaluru, India
Infotact Solutions *Sep 2025 – Dec 2025*

- Developed AI-powered applications using **Python**, **LangChain**, and **LLM APIs** with **RAG** pipelines and vector databases.
- Built **REST APIs** and integrations for enterprise systems using **FastAPI**.
- Used **Git** and standard development workflows for version control and collaboration.
- Collaborated with cross-functional teams to deliver AI solutions from discovery to deployment.

Key Projects

AI-Powered Internal Tooling Platform | ***Python, JavaScript, Claude Code, Codex, LLM APIs, Agent Frameworks, SQL,***

- Built AI-powered internal tooling platform using **Python**, **JavaScript**, **LLM APIs**, and **agent frameworks**, achieving [95%] user adoption and [40%] time savings.
- Used coding agents including **Claude Code** and **Codex** to build significantly faster, reducing development time by [50%].
- Designed and maintained automations, integrations, and workflows for Sales, Marketing, and RevOps teams, improving productivity by [35%].
- Used **SQL** and databases for data workflows, achieving [99%] data accuracy across [10K+] records.
- Owned solutions from problem definition through rollout and maintenance, ensuring reliable software delivery.

Business Process Automation System | ***Python, JavaScript, LLM APIs, Agent Frameworks, SQL, Git***

- Developed business process automation system using **Python** and **JavaScript**, eliminating [60%] of manual work for business teams.
- Integrated with existing tools and built custom software where needed, optimizing for speed and reliability.
- Used **LLM APIs** and **agent frameworks** for AI-powered automation, achieving [92%] accuracy.
- Worked with business teams to turn loosely defined problems into working solutions, delivering [5+] automation projects.
- Used **Git** and standard development workflows for version control and collaboration.

Data Workflow and Integration Platform | ***Python, SQL, REST APIs, Git, Integrations, Automations***

- Built data workflow and integration platform using **Python** and **SQL**, achieving [99%] data accuracy and [50%] faster data processing.
- Integrated with enterprise tools and data sources via **REST APIs**, improving data accessibility by [40%].
- Created automations and workflows that reduced manual effort by [60%] for business teams.
- Used **Git** for version control and maintained reliable software through standard development workflows.
- Owned solutions from problem definition through rollout and maintenance, ensuring business value delivery.

Education

Aditya Degree College B. Kotha Kota
Bachelor of Computer Applications (BCA); CGPA: 9.05/10 *2026*

Awards & Achievements

- Awarded Best College Website Developer by Aditya Degree College for excellence in website development (2025).
- Reduced development time by [50%] using Claude Code and Codex for AI-native development.
- Delivered [10+] business solutions with [95%] user adoption and [92%] AI accuracy.
